

PCSchool and FACTS Partnership Offering an Integrated Solution

We are excited to announce that FACTS and PCSchool have formalised a partnership. PCSchool will work with FACTS to provide an integrated “best in class” debt management system for their portal. This will allow parents to make once-off payments and set-up payment plans for their families tuition and incidental bills. PCSchool and FACTS are already providing an integrated solution for over 500 families at Kings Baptist Grammar in Adelaide.

PCSchool has been providing a total School Administration Software solution to Australia and New Zealand schools since 1986. Recent results at a national survey show that PCSchool are “simply better”, scoring satisfaction ratings of 70%, 88% and 89% respectively for flexibility, value for money and support. Importantly, their support was ranked 20% in front of any other Student Information System. As a trusted “point of truth” PCSchool has sought out other best of breed suppliers to enable their users to access and benefit from other market leaders.

What they say about the partnership:

‘What an exciting partnership for PCSchool and FACTS in that we can now give our users not “simply better” but “simply the best” software for School and Debtor Management. Software that is best of breed, best supported and best value for money.’

Brendan Croese | Managing Director | PCSchool

‘The integration of PCSchool for school financials and FACTS for tuition management will be of great benefit to schools. They are both easy to use systems which deliver real results for both the school but more importantly the families we serve.’

Darren McDonald | Business Manager | King’s Baptist Grammar School

‘We are very pleased to be working with PCSchool. We share similar values and look forward to working together to provide a “best in class” debtor management option for the PCSchool portal and the families we serve.’

Daryn Grantham | National K-12 Manager | FACTS Management

Benefits to Schools

- Seamless integration
- Enhanced debtor collection and reporting
- Reduced administrative costs
- 24/7 Online self-service payment plans
- Improved reconciliation
- Reduced PCI/DSS scope
